Mileage	71,820
Insured	Devon Park (Northwind Mutual Insurance, policy NM-AUTO-661820)
Claim number	NM-CLM-2026-05-913

Narrative

Reporting party Devon Park was contacted by responding officer at the scene, the cell-phone waiting lot adjacent to the airport drop-off curb, at approximately 02:22 on 2026-05-08. Driver stated he was "returning from a drop-off" and merging back onto the inner roadway when the front of his vehicle made contact with a low-profile concrete bollard. One passenger was observed in the rear seat at the time of the officer's arrival; the passenger declined to provide identification and stated they had "just been given a ride". The relationship between the driver and the passenger was not established. No injuries reported. Driver showed no signs of impairment; field sobriety not warranted.

Vehicle exterior was inspected at scene. The following items were noted as pre-existing (not related to the impact) and recorded for completeness:

- A removable rooftop placard mount (suction-base) was affixed to the roof above the windshield; placard itself was not displayed.
- A partially-removed adhesive trade-dress decal was visible on the lower-left rear quarter window glass; residue ring approximately 12 cm in diameter.

- Two phone-mount cradles were installed on the dashboard, oriented toward the driver and toward the rear-seat passenger respectively.
- A windshield-mounted dash camera was active and pointed forward.

Impact-related damage observed: front bumper cover crumpled centre-left, hood buckled at leading edge, left headlamp assembly cracked, radiator support bent, AC condenser visibly leaking. Vehicle was driveable at low speed; towed for repair as a precaution. Passenger left scene on foot prior to tow.

Signed: Ofc. J. Alvarez, 2026-05-08
